Any

Difficulty level

Purpose

Line & Angles

Objective

Angle awareness – Promote placed stones into house.

Stones are arranged according to the diagram. The space between the stones is approx one inch. (similar to *Pop goes the Weasel* however stones have a one inch gap)

Allow one round of practice. By the second round, the team should have realised unless they are very accurate the team will not be able to straight promote – should realize that they will have to use angles! (i.e. first stones promoted to wings)

Different levels of play.

Easy – 4 or 8 stones placed, play from near hog line

Hard – 4 or 8 stones placed, play full length

Scoring

A point for every placed stone promoted to house or biting the house.
